

planetary

Company: Planetary SA

Role: *Yeast/Bacteria Fermentation Scientist*

Location: Fribourg, Switzerland

Start date: Ongoing

Terms: 100% time commitment

Salary: Competitive compensation and participation in an attractive employee stock option plan

The Company:

planetary is SCALING THE NEW PROTEIN REVOLUTION. We are a venture backed food-tech company with 12 FTE across 3 locations. By building industrial-scale bioprocessing capacity and IP globally we are enabling a sustainable shift in the food system from livestock to non-animal proteins. To support the further development of our scientific expertise, planetary is searching for an experienced *yeast and bacteria fermentation scientist*.

The Position:

- Designs and executes experiments on precision fermentation processes involving recombinant yeast and/or bacteria to maximize key metrics such as yield, productivity, robustness, and scalability at various fermentation scales
- Develop and optimize fermentation media, feeding regimes and robust, economical, and scalable fermentation processes
- Design suitable control systems (PAT) for monitoring and control of the process
- Has some knowledge of cell separation systems and basics of protein purification
- Works in close collaboration with the CSO and other upstream groups to assist with strategic initiatives and platform development
- Search, identify, demonstrate, and implement new processes/ technologies/instruments to optimize and automate fermentation workflows
- Document all trials & conducted analyses in a well organized electronic lab notebook following GDP concepts
- Communicate with internal and external stakeholders through PM platform, meetings and written emails, reports, and presentations
- Mentor and train junior team members

Qualifications and Experience:

- BSc with 5+ years, MSc with 2+ years or PhD with experience in biochemical engineering, biochemistry, microbiology, or a related field, or a comparable combination of experience and training
- Prior experience in the development and implementation of robust microbial scale-up processes
- Knowledgeable in systems and best practices for industrial fermentation, sterility assurance, biomass processing equipment, and process automation
- Flexible working hours with evening and/or weekend work as required by practical work
- *Preferred:* Prior yeast fermentation experience for scale-up
